

Belgrave Station

Start of construction on multi-level car park

VicTrack is delivering a new multi-level car park at Belgrave Station through the Victorian Government's Car Parks for Commuters program.

The 640-space car park will include CCTV and lighting, lifts, a public announcement system, 16 new accessible parking spaces and an undercover pick up and drop off area.

The project will also deliver a widened access road to the car park, a priority exit lane and signals for buses at the roundabout, and improved pedestrian safety.

Early works, including modifications to Belgrave-Gembrook Road and temporary train driver parking, have already been delivered.

From 23 March 2022, works are underway to construct the new car park, which requires the closure of the existing commuter car park at Belgrave Station.

Car park and footpath closure

When construction of the car park starts on 23 March 2022 the existing Belgrave Station car park will close. No commuter car parking will be available at the station.

Alternative parking is available in a temporary car park that has been built at Upwey High School. The car park is accessed via Chosen Avenue and is within walking distance to Upwey Station.

There will also be no passenger drop off/pick up points within the car park area. Commuters are advised that Yarra Ranges Council will be enforcing parking restrictions in Belgrave's town centre.

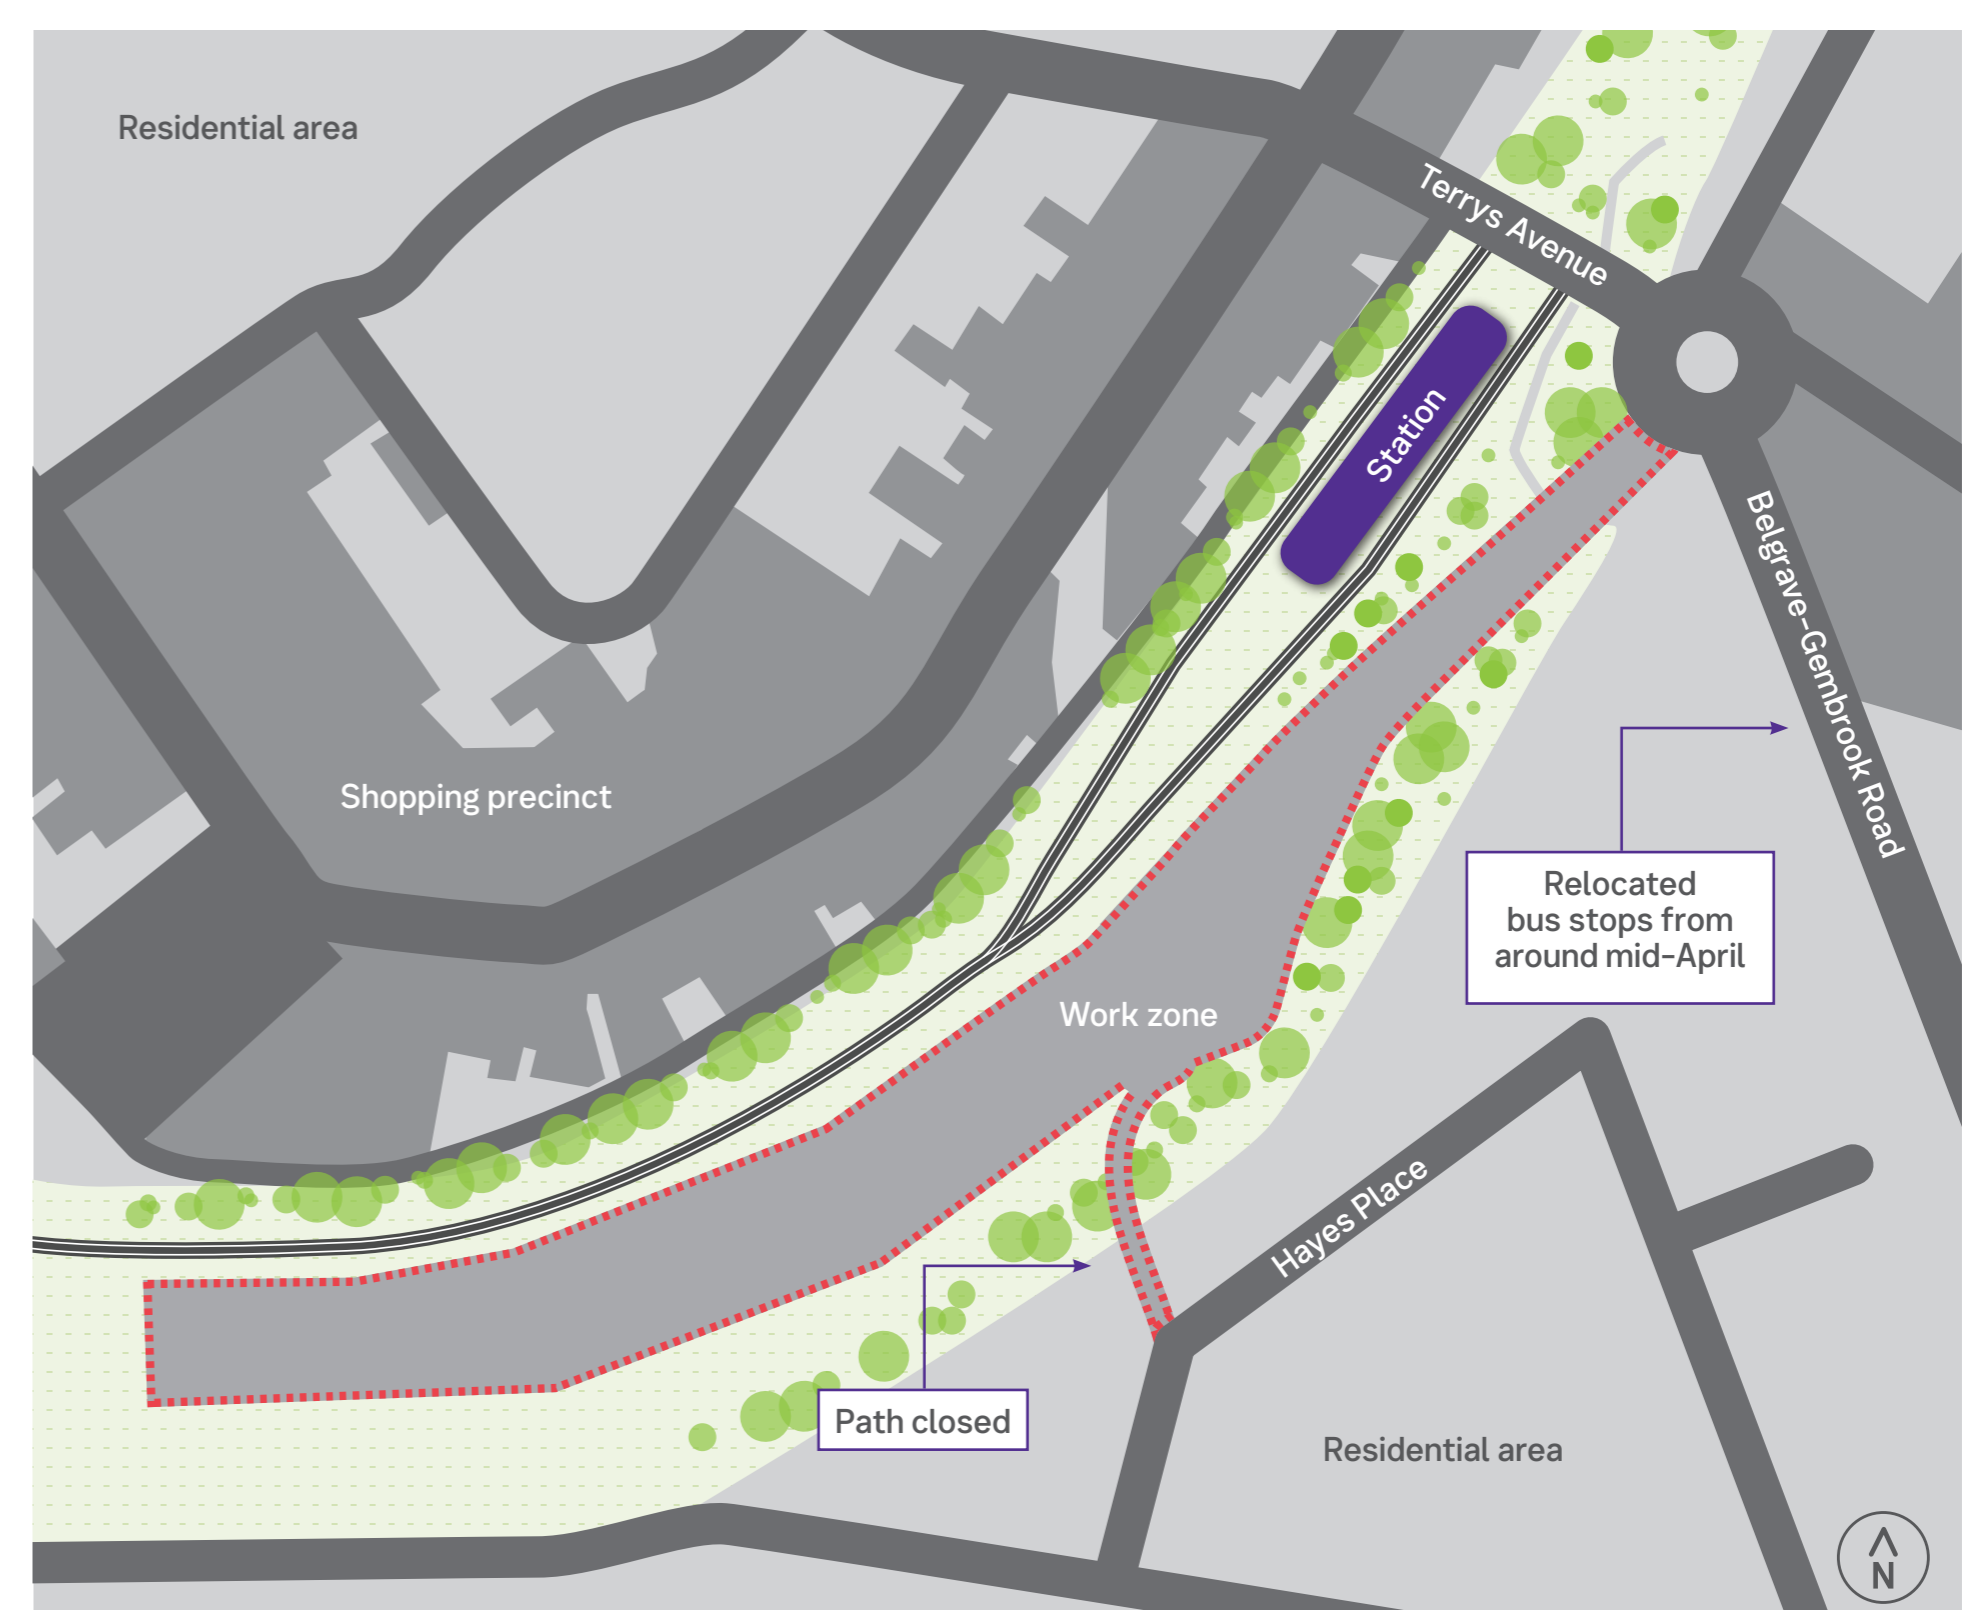

For the safety of commuters and local residents, the pedestrian pathway between Hayes Place and the station precinct will also be closed. People should allow extra time to walk around the worksite.

From around mid-April 2022 bus stops within the existing interchange will be relocated to Belgrave-Gembrook Road.

About the works

During the works, traffic management will be in place and barriers will be installed for the safety of station users and residents. Please follow all signs in place.

The works will not impact train operations. The majority of works are scheduled to take place from Monday to Friday during normal construction hours. If you are nearby you may hear noise from the works.
